

# The Smart City School

A collaborative workshop  
to train your ecosystem and to design your smart city

Smart Cities are at the **crossroad of many disciplines**

- Technology, human and political sciences, innovation methodologies, economy and entrepreneurship
- It will be difficult for an individual to master all these fields of knowledge and practice

This is a matter of **transition** !

- Uses, behaviours, ecosystem, governance and economy

An **innovation approach** is necessary and must be implemented within **multidisciplinary teams**,

With a **holistic approach** based on :

- the **actual problems** and **objectives** of the territory
- own **experience** and **knowledge** of the participants

**Directly actionable projects** must emerge quickly, including **entrepreneurial** ones

Students, elected officials, local authorities, companies, urban planners, architects, civil society...

**You can shape the future of your city, together**

**Knowledge - Multidisciplinary**  
**Innovation - Action - Transition - Autonomy**

## Method and Organization

- **Active pedagogy** based on local territorial issues : « **learning by doing** », **innovation** and **connectional intelligence**
- From **5 to 12 days**.  
**Other available formats** : split over multiple 2 or 3-day sessions, with intersessions coaching. Summer schools.
- Detailed **program is built collaboratively** with your territorial experts and your academic resources
- **Magisterial presentations** by our experts and yours
- **Practical workshops** based on your own use cases
- Provision of a technology, future jobs, case studies and good practices **data base**

## Benefits

**New knowledge** and keys to support continuous acquisition

**Local federated ecosystem**, getting autonomy to replicate used methodologies

**Projects** to be developed immediately, for a **quick validation and deployment**

Improved **capabilities to define and outsource** your future needs

## Coaching and Pedagogy

Pr. Derrick de Kerckhove  
**Media Duemila** – Sociologist,  
Marshall McLuhan collaborator  
Toronto – Rome
